

Disqualifying Conditions

Drum Return Standards

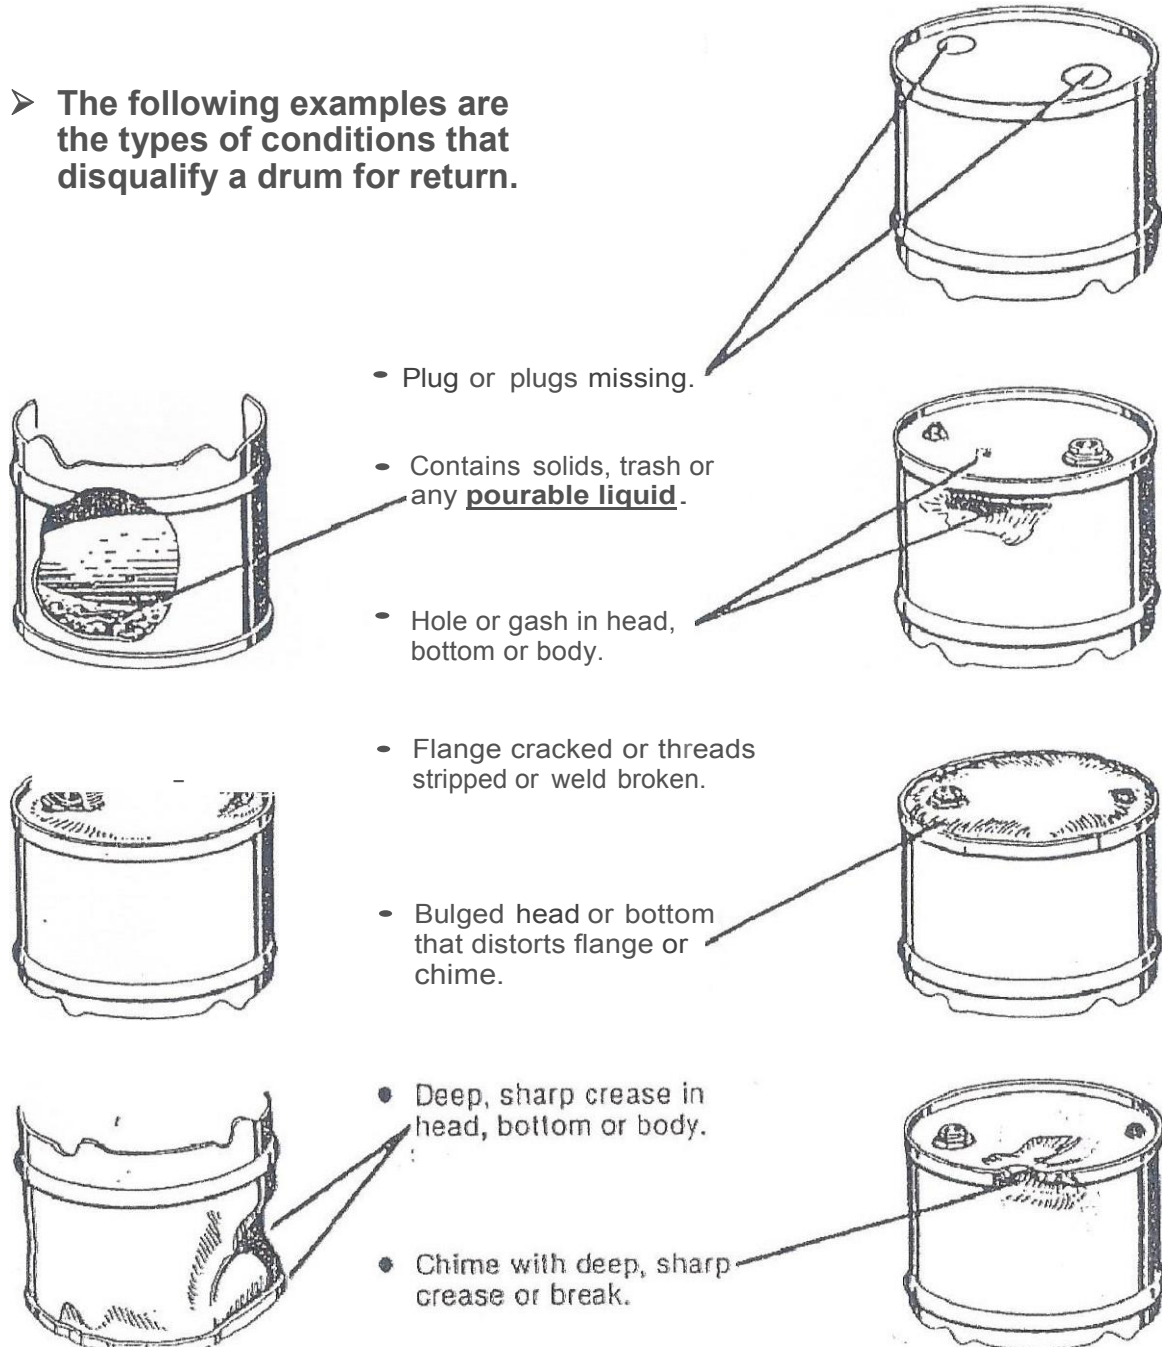

For pick-up and deposit refund or credit, an emptied drum must meet the standards shown below:

1 The drum plugs must be in place.

2 The drum must not contain solids, trash, or any pourable liquid.

3 The drum must be reconditionable

➤ The following examples are the types of conditions that disqualify a drum for return.

• Plug or plugs missing.

• Contains solids, trash or any pourable liquid.

• Hole or gash in head, bottom or body.

• Flange cracked or threads stripped or weld broken.

• Bulged head or bottom that distorts flange or chime.

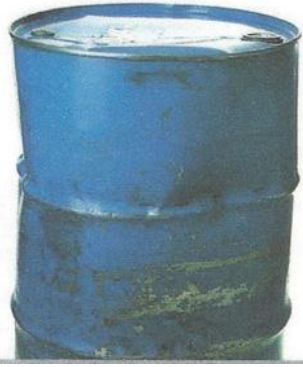

• Deep, sharp crease in head, bottom or body.

• Chime with deep, sharp crease or break.

Poly Drum Return Policy – Disqualifying Conditions

SCL maintains a strict policy not accepting any **POLY DRUMS** associated with the following criteria:

- 1.) Any drums containing retain or solids (use of droplight required)
- 2.) Any Unmarked, Illegible or Non-labeled drums
- 3.) Stored Chemicals such as: (Cleaners, Solvents, Degreasers, Alcohols, Glycols, Antifreeze)
- 4.) Any drums with distortions, punctures, tears or any damage to the hull, body, bungs or plugs.
- 5.) Any non SCL distributed brands and products.

Exceptions to Policy: (Products Sold by SCL to Customers)

- Olympus branded DEF
- Olympus branded Antifreeze
- Propylene Glycol
- Ethylene Glycol
- BioTuff Degreaser
- Techcool 35048

STOP...

As a reminder it is strictly prohibited to identify unmarked products using **SMELL**. Due to the unforeseen nature of the internal contents, this could prove highly detrimental to an individual's overall health if inhaled.

In maintaining compliance with the [California Department of Toxic Substance Control](#), [Department of Transportation](#), [Environmental Protection Agency](#) and [Occupational Safety and Health Administration](#) SCL reserves the right to reject, disqualify or deem any suspicious Poly or Metal drums unacceptable for transportation.
