
Castrol Automotive & Heavy Duty Pricing Announcement

Dear Valued Customer,

BP Lubricants USA Inc. is committed to providing you with industry leading products, services, and expertise you need.

Effective April 1, 2022, certain Castrol and BP branded passenger car, commercial and synthetic finished lubricants will have a price increase of up to 20%. These pricing adjustments are primarily attributable to rising costs of raw materials, packaging, and transportation.

- BMW and EDGE Professional Jaguar Land Rover/Volvo exclusive products are omitted from this pricing action.

Please note the following:

- All orders received after March 31, 2022 will be invoiced at the new price. Orders must be received by BP Lubricants USA Inc. before 5 pm central time on March 31, 2022 to receive the pre-increase price and will be shipped within the standard lead time.
- Castrol reserves the right to limit monthly purchases between March 1 and March 31, 2022 to 100% of your average monthly purchases. Given the continued challenging supply environment, purchases may be limited to less than 100% of your average monthly purchases. Orders exceeding 100% of your monthly sales allocation averages may be repriced accordingly and those purchases may be moved to future ship dates.
- A detailed price list by product will be published and communicated in the coming weeks.
- All other terms and conditions remain unchanged.

As always, we sincerely appreciate and value your business. Should you have any questions, I encourage you to contact your Castrol Distributor Business Manager.

Thank you for your continued support.

Best Regards,

Andrew Della Bella
PCO & HD US Distributor Sales Director
