
Castrol Automotive & Heavy Duty Pricing Announcement

Dear Valued Customer,

BP Lubricants USA Inc. is committed to providing you with industry leading products, services, and expertise you need.

Effective September 1, 2022 certain Castrol and BP branded passenger car, commercial and synthetic finished lubricants will have a price increase of up to 15%. These pricing adjustments are primarily attributable to rising costs of raw materials, additives and transportation.

Please note the following:

- Products excluded from the pricing action include: Radicool; BMW and EDGE Professional Jaguar Land Rover/Volvo exclusive products (please see table of sku's below).
- **Orders must be received by BP Lubricants USA Inc. before 5 pm central time on August 31, 2022 to receive the pre-increase price.** All orders received after August 31, 2022 will be invoiced at the new price.
- Castrol reserves the right to limit monthly purchases between August 1 and August 31 to your monthly allocation levels. If applicable, orders exceeding your monthly allocations may be repriced accordingly and potentially moved to future ship dates.
- A detailed price list by product will be published and communicated in the coming weeks.
- All other terms and conditions remain unchanged.

As always, we sincerely appreciate and value your business. Should you have any questions, I encourage you to contact your Castrol Distributor Business Manager.

Thank you for your continued support.

Best Regards,
